

### Developers:

The developers of the app are Abhijit Biswas and Pritish Prusty, both pursuing B.Tech(2<sup>nd</sup> year) stream: Computer Science, from Lovely Professional University, Phagwara, Punjab-144411. We have made the current app within 12 days starting from 5<sup>th</sup> July to 16<sup>th</sup> July. This is a dedicated project done under **Digital India AatmaNirbhar Bharat Innovate Challenge. We are looking forward for improvising and developing the all-in-one eLearning app.**

### About the app:

My ShakSham is an e-learning platform for all. Here students will get all the features in one app. We will talk about the features in the coming time. It's a platform that is given to all students to interact with each other from all over the world and grow together. This is just a start to the app and we will be adding new features soon through the updates.

**Note: This app is totally built from scratch data.**

### **Features:**

#### **I. Looks:**

1. **Simplicity:** We have tried to keep the app as simple as possible so that anyone can use it easily. The overall app has a minimalistic look that looks good and is eye catchy.
2. **Color :** We have kept the overall color of the app as black as dark theme is trending and also it puts less pressure to the eyes of the user, with a mixture of some colorful cards that enhances the mood of the user to read.

#### **II. Main Theme:**

1. **Notes:** we are having some wide range of prebuilt notes and PowerPoint presentation. The most interesting feature of note is that any student can submit the notes into the app and thousands of students can access it from anywhere in the world.
2. **Subjects:** currently for a starting version we are here with main 4 subjects but within a month we are going to add many more subjects from different streams.
3. **Class:** Currently for a starting version we are here with Class VI -X but within a month we are going to add many more classes starting from lower school to Colleges.

#### **III. Other features:**

1. **Login:** One can Login into it with the help of email id and password, otherwise we have a more secure way of Google login system and soon we could see the Facebook login on the app.
2. **Search:** We are providing our user with a search bar for more convenience to search the subject and directly jump into learning.

3. **Dashboard:** An interactive dashboard with many GIFs that looks cool and user friendly. Those gives an artistic and a good look to the UI design.
4. **Menu:** Every App is providing with an menu drawer in an App bar, so we thought of giving our user a simplified and friendly experience by giving a dedicated page to the user that lets the user to customise their profile.
5. **Sorted:** The app is fully sorted with the chapters. It has a Class Page where the user can check out their respective classes and their chapters. It is placed in an organised manner.

**IV. Features Coming Soon:** There are a lots of interactive features coming soon.

**1. Facebook Login**

2. **Chat feature:** Where the users could interact one on one through a chat UI. Many a time we go to a chat in other apps for a work and gets distracted so we are introducing this feature so that the user could share the notes or chat within the app without getting distracted.
3. **Statistics:** This feature will give the user a Statistics that how many hrs did he studied for and he could set a limit for that so that the user could organize and complete his studies on time.
4. **Scribble:** The scribble features is used to take notes. The user could take notes into the app either with the help of an electronic pen or by simply typing .
5. **Subjects and Classes:** We are going to add numerous subjects to the app with many more classes very soon.
6. **Donate notes:** If one wishes to donate notes then the user could easily upload notes to our app which will be verified by us and be published on the app and they would be paid some credits for the same.
